evening (5 to 10 pm)**

All of Southeast Michigan

Hazards Summary Review

This afternoon and evening

- A chance of thunderstorms during the afternoon and evening. Greatest potential for severe thunderstorms between 5 and 10 pm.
- Amount of cloud cover and degree of destabilization this afternoon brings some uncertainty and will dictate the intensity of any thunderstorm development. Coverage and severity expectations will be refined throughout the day based on the latest observational data.
- Storms will be capable of producing damaging wind gusts and large hail. There is the potential for tornado development.
